

## **FREQUENTLY ASKED QUESTIONS**

### **What is the mission statement of Software Solutions?**

*The mission statement of Software Solutions Inc. is to provide the educational tools needed by both new and seasoned commodity traders and equity investors to be in the small minority of individuals who are consistently successful in the marketplace. We are educators with extensive practical backgrounds in education, business, investment finance, and computer science. We are successful traders who work with individuals who have a focused desire to become competent and capable of making their own investment decisions and have the necessary discretionary funds to do so.*

*We are not brokers, CTA's, or Financial Planners. We do not offer or provide financial planning advice. Investments involve risks, including possible loss of principal and other losses. If financial or other professional advice is required the services of a competent investment professional person should be sought.*

### **Why was EntryPoint 2000i developed?**

*Recognizing that trading only in the direction of the main trend of the market was essential to successful trading, ENTRYPOINT 2000i was developed to provide information regarding the least risk position within the main market trend to enter a trade.*

*ENTRYPOINT 2000i is designed as a tool to work harmoniously within the underlying market trend. It is not intended to identify market tops or bottoms. It is an educational tool to help intra-day traders and position investors identify the underlying trend; find the most profitable / least risk positions within that trend.; monitor the momentum of the trend, market price action, & provide reversal alerts and identify the new market trend.*

### **Is EntryPoint 2000i difficult to use?**

*EntryPoint 2000i is simple to use. It is colorized into easy to interpret tools which visually identify the main trend and the most profitable /least risk positions within it.*

### **Who is using EntryPoint 2000i?**

*EntryPoint 2000i is being used profitably by large trading institutions, individual investors, novice traders, and seasoned professionals both on and off the floor.*

### **How do the indicators work?**

*Multiple indicators and studies (such as RSI, Moving Averages, Stochastics, Oscillators, etc.) have been transformed into a suite of easy to read “colorized” tools. When the indicators/tools are in agreement, a “same color” format is displayed for easy interpretation for both long and short positions.*

### **What indicators are included with EntryPoint 2000i?**

*EntryPoint 2000i provides more tools and indicators than any of its competitors. Take a look!*

*TREND INDICATORS* - *EntryPoint 2000i was designed to first identify the underlying main trend. It does this by painting the Main Trend Indicator blue when the underlying trend is up; red when it is down; and yellow during periods of congestion or market reversal. By trading with the underlying trend the statistical odds of successful trading are greatly improved.*

*Our new version also includes a Mid Term Trend Indicator, which is a shorter term version of the Main Trend Indicator and is interpreted in the same manner.*

*ALERTS* - *EP will mark the current price bar with a large (blue) alert under the bar if a potential least risk buy condition exists. Market reversal/exit alerts are then painted with a small (red) alert above a corresponding bar. EP will mark the current price bar with a large (red) alert above the bar if a potential least risk sell condition exists. Market reversal/exit alerts are then painted with a small (blue) alert below a corresponding market price bar.*

*ALERT SETUP BARS* - *EntryPoint 2000i will color price bars in an enhanced mode to indicate least risk entry points within the trend. When the trend is up, LR entries are painted enhanced blue. When the trend is down, LR entries are painted enhanced red.*

*MARKET PRICE BARS* - *Market price bars are designed to identify the price action of the underlying market. EP is defaulted to paint blue bars to indicate upward price action and red bars to indicate*

*downward price action. Black bars (color of suggested price data default) indicate neutral price action.*

**TREND STRENGTH OSCILLATOR** - *The Trend Strength Oscillator completes the picture of market momentum, direction, and strength of the trend in one easy to read indicator. If the overall momentum of the market is Up, the bars will be above the “zero” line (pointing up). Likewise, if the momentum is Down, the bars will be below the zero line (pointing down). The stronger the momentum is, the longer the length of the bars. The color of the bars indicates the quality of the trend. Blue bars indicate an uptrend, Red bars a downtrend. Magenta bars in either direction indicate a weak trend or changing trend. Yellow bars indicate caution, identifying congestion within the trend.*

**If I have a problem installing or using EntryPoint 2000i, is tech support available?**

*EntryPoint 2000i is so simple to use our tech reps are not any busier than the Maytag repairman. However, if you need help installing the program in your Omega research product you may contact Omega Research Tech Support at 305/551-9903. Specific inquiries about EntryPoint 2000i may be queried at 800/825-9848 Mon-Fri 10am-4pm.*

**Does EntryPoint 2000i have a trial version?**

*We offer a fully functional 30 day demo for \$99 and a 90 day trial version for \$499*

**How much does EntryPoint 2000i cost?**

*EntryPoint 2000i is available on an annual lease basis. The first year lease, complete with manual and trading guidelines is just \$14995.00. Renewals and upgrades for any subsequent year is just \$695.00 per year. If you would prefer to purchase EntryPoint 2000i you may do so for a one-time charge of \$2,495.00. When you consider all the educational tools in the EntryPoint software, and compare it to any of our competitors, it is the most affordable software tool available on the market today.*
